Data Files

STATGRAPHICS Mobile saves data in files with the extension .sgm. These files contain both data and column properties, including data type and use, preferred scaling, specifications limits, and distributional assumptions.

Output

Integrated graphics and numerical results. Supports both portrait and landscape mode. VGA output is supported.

Data Synchronization

If desired, data files may be synchronized with STATGRAPHICS Centurion 15.1 or later running on a desktop or notebook computer.

Documentation

Program documentation is in the form of PDF files, including one User Guide and additional files describing each statistical procedure. Includes sample data files, equations, and worked examples.

Session Log Files

Output may be saved in log files for later review or dissemination.

STATGRAPHICS Mobile Assistant

Installed on Windows desktop or notebook computer during installation. Converts SG Mobile log files to RTF files for printing or copying to other applications.

Trial Copies

Full system. Expire 15 days after first installation. May be converted into licensed system by entering serial number and activation code.
